IM3 INTEGRATED MULTISECTOR MULTISCALE MODELING

IM3 FUTURE URBAN MORPHOLOGY MODELING CHAIN

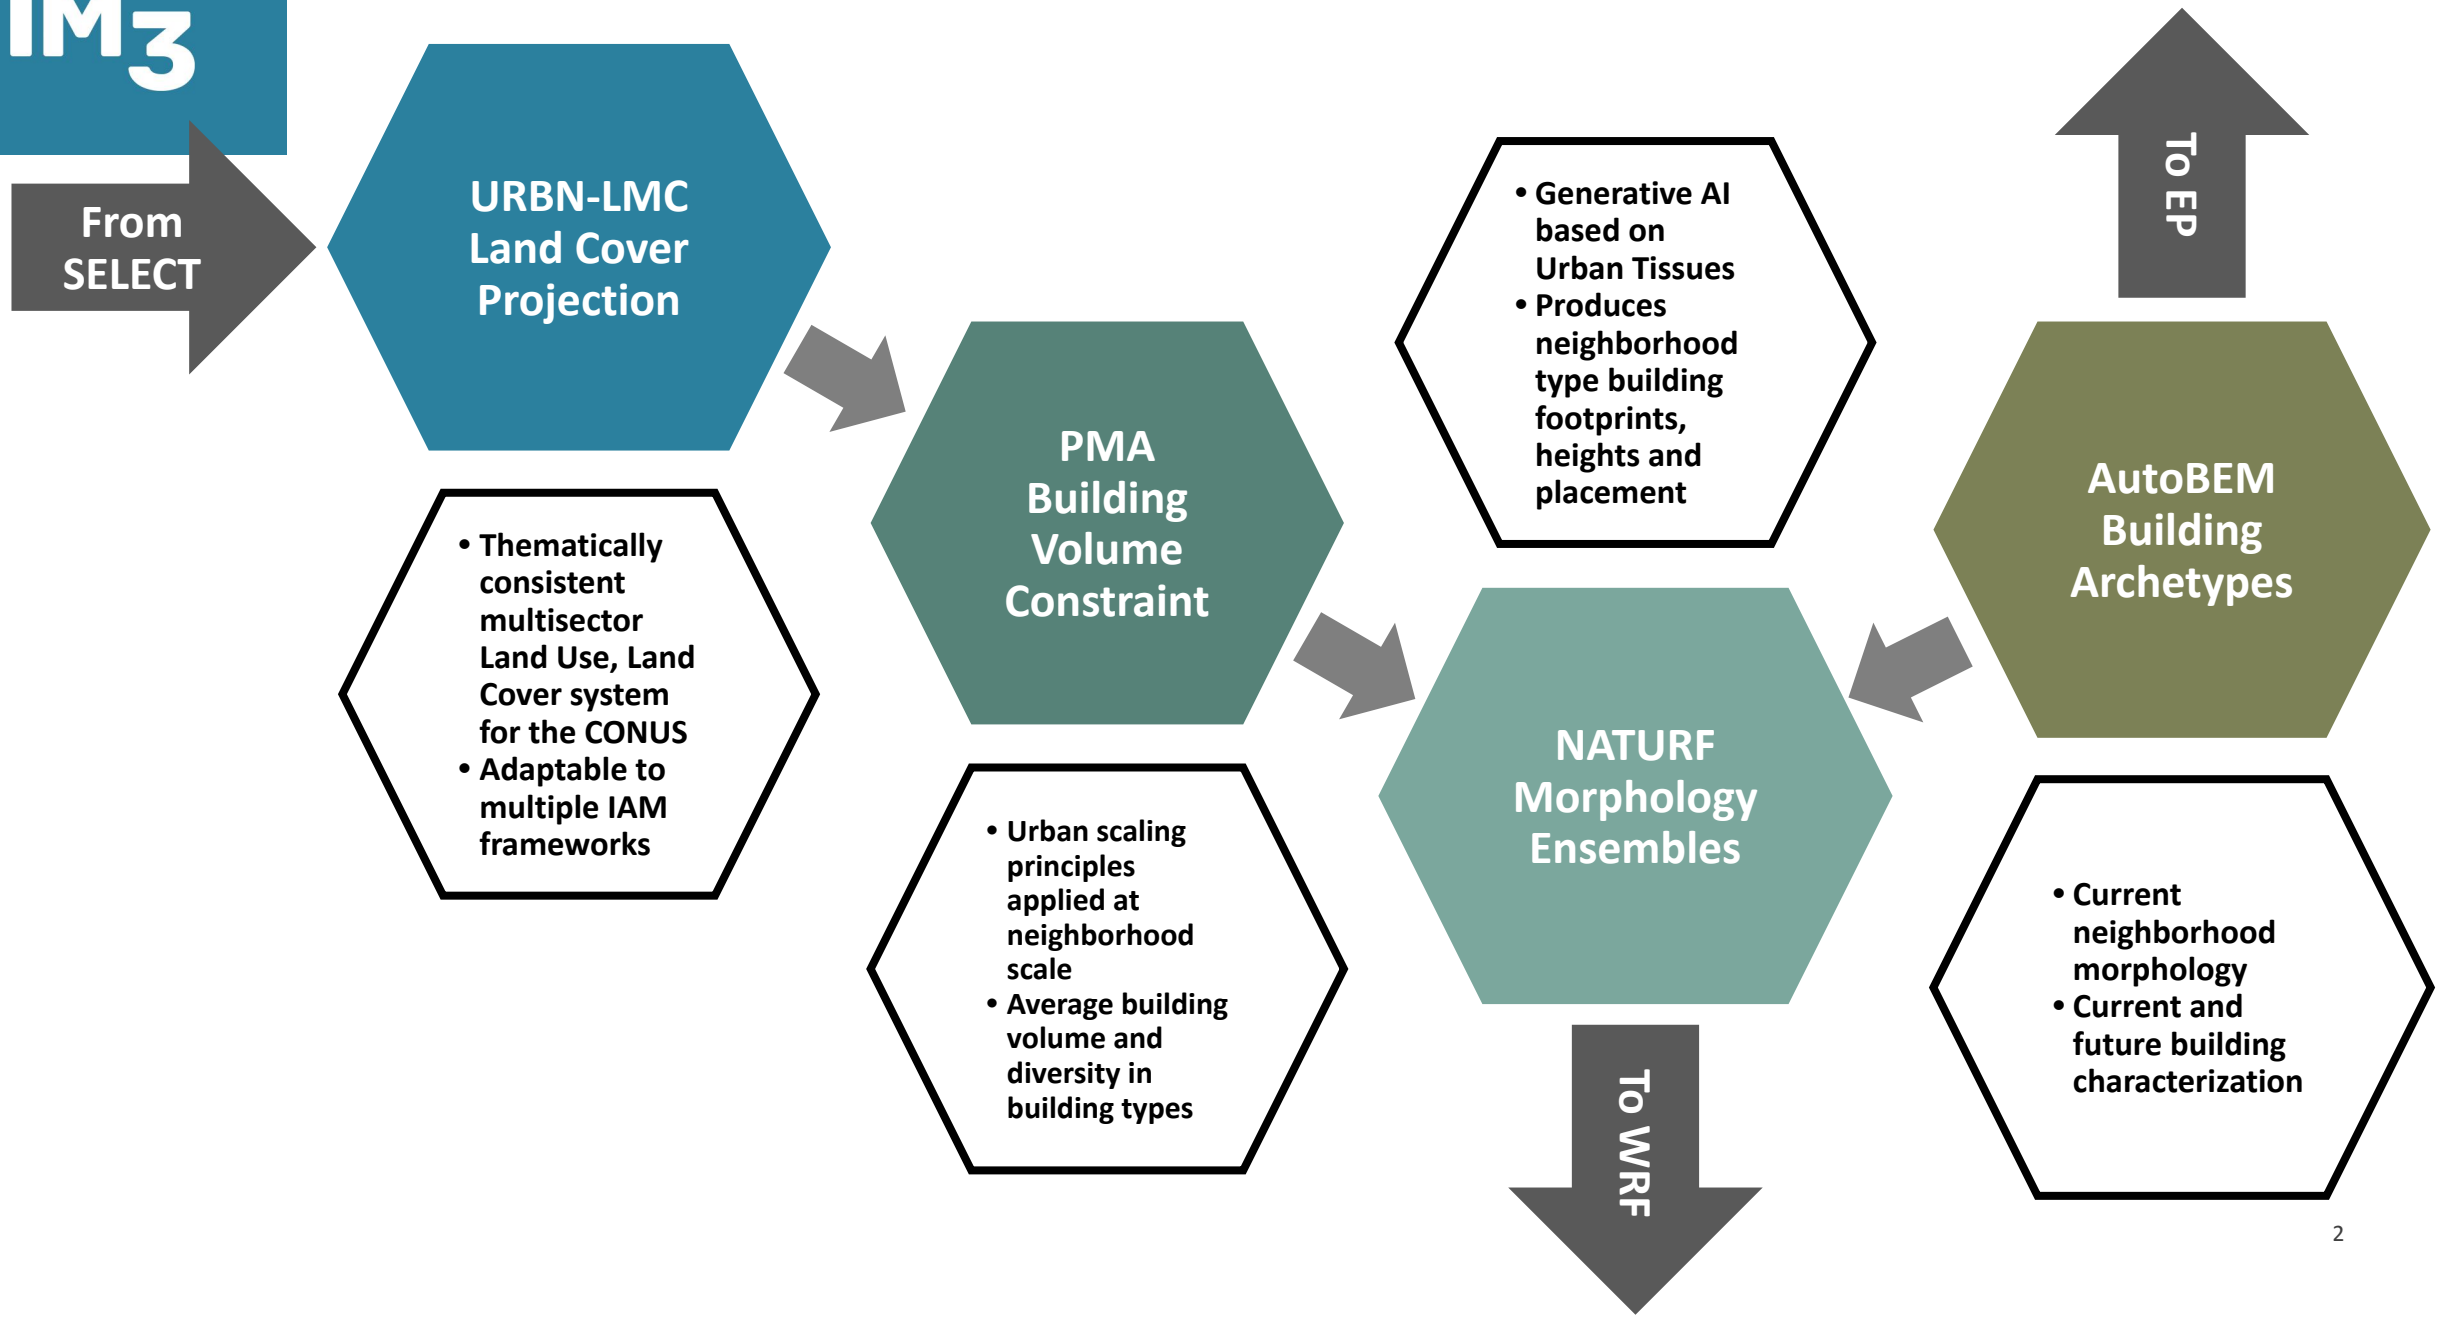
Melissa Allen-Dumas[1], Bhartendu Pandey[1], Joshua New[1], Frank Li[1], Ryan McManamay[2], Jill Sturtevant[2], Levi Sweet-Breu[2], Em Rexer[3], and Chris Vernon[3]

[1]Oak Ridge National Laboratory, [2]Baylor University, [3]Pacific Northwest National Laboratory

This research is supported by the U.S. Department of Energy, Office of Science, as part of research in MultiSector Dynamics, Earth and Environmental System Modeling Program

Pacific Northwest NATIONAL LABORATORY · Baylor University · BERKELEY LAB · BOSTON UNIVERSITY · UCDAVIS UNIVERSITY OF CALIFORNIA · Cornell University · NC STATE UNIVERSITY · THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL · OAK RIDGE National Laboratory · Sandia National Laboratories

IM3



From SELECT
URBN-LMC Land Cover Projection
• Thematically consistent multisector Land Use, Land Cover system for the CONUS
• Adaptable to multiple IAM frameworks
PMA Building Volume Constraint
• Urban scaling principles applied at neighborhood scale
• Average building volume and diversity in building types
• Generative AI based on Urban Tissues
• Produces neighborhood type building footprints, heights and placement
NATURF Morphology Ensembles
To WRF
To EP
AutoBEM Building Archetypes
• Current neighborhood morphology
• Current and future building characterization
