

P. The ACME “Classic Viewer”

John Harney, Marcia Branstetter, Daniel Ricciuto, Ben Mayer, Kate Evans, Valentine Anantharaj (ORNL)

Issue

Sharing diagnostics plots:

The process of sharing output plots from AMWG and LMWG is currently a tedious process (e.g. emailing, USB, etc). Figures should be viewable from the web.

Solution Idea

The simple classic viewer workflow makes this possible:

- Organize images in a simple hierarchy
- Move the plots to CADES using an easy-to-use python and batch scripts
- View and navigate through the plots in a similar manner to original AMWG
- See confluence:
