

Radiative and Dynamical Forcing of El-Niño-Related Global Temperature Anomalies in the Observations and in CMIP5 Models

Introduction

Temperature response to ENSO

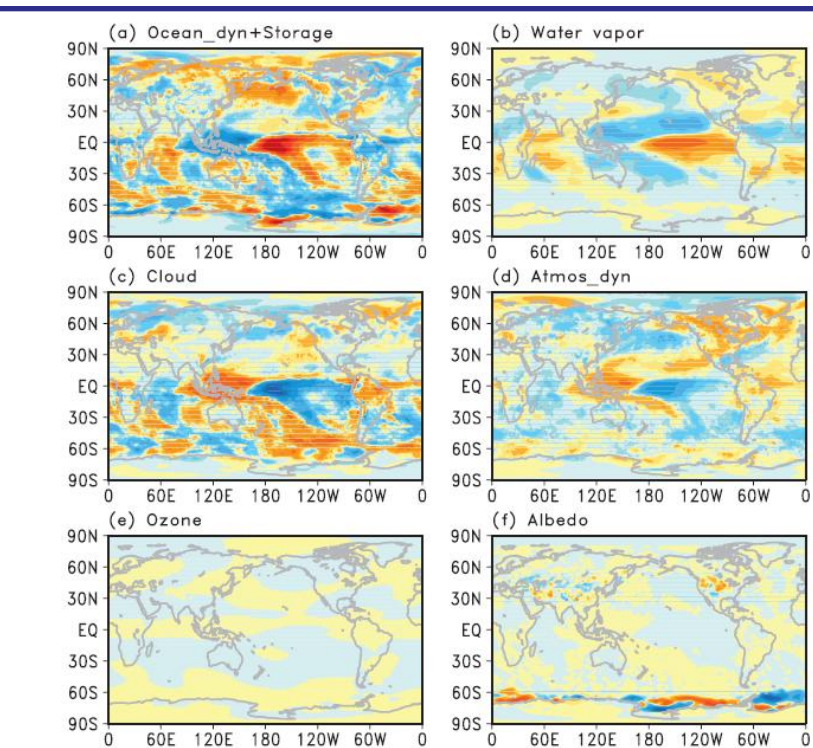

- Tropical Gill-type response
- PNA pattern
- Storm track change
- High-latitude stratospheric warming

ENSO-related Feedback

- Water vapor feedback
- Cloud feedback
- Albedo feedback
- Ozone feedback
- Ocean dynamics and sensible/latent heat flux
- Atmospheric dynamics - atmospheric bridge

Climate Feedback-Responses Analysis Method (CFRAM)
 Cai and Lu (2009), Lu and Cai (2009)

Decomposition of temperature response to ENSO in observation

Deng et al. (2012), Park et al. (2012)

Suggested Question: How about ENSO-related temperature decomposition in the CGCMs?

Data

- Observation: The ERA-interim**
 - Period: 1979~2010, Only DJF data are analyzed.
- CMIP5 Models**
 - Historical run of 1861-2005. Only DJF data are analyzed
 - 15 Models: BCC-CSM1-1, BNU-ESM, CCSM4, CESM1-CAM5-1-FV2, GFDL-CM3, GFDL-ESM2G, GISS-E2-H, GISS-E2-R, IPSL-CM5A-LR, MIROC5, MIROC-ESM, MIROC-ESM-CHEM, MPI-ESM-LR, MPI-ESM-P, NorESM1-M

Methods

CFRAM Formulation

- The **total energy balance** at M atmospheric layers and one surface (M+1)th layer

$$\vec{R} = \vec{S} + \vec{Q} \leftarrow \text{Energy due to non-radiative dynamical processes}$$

↑ SW radiation flux
 ↓ LW radiation flux
- The difference between two climate states

$$\Delta \frac{\partial \vec{E}}{\partial t} = \Delta \vec{S} - \Delta \vec{R} + \Delta \vec{Q} \leftarrow \text{non-radiative}$$

Change in energy storage

$$\Delta \vec{S} \approx \Delta \vec{S}^{(w)} + \Delta \vec{S}^{(c)} + \Delta \vec{S}^{(a)}$$

$$\Delta \vec{R} \approx \Delta \vec{R}^{(w)} + \Delta \vec{R}^{(c)} + \frac{\partial \vec{R}}{\partial T} \Delta \vec{T}$$

$$\Delta \vec{Q} \approx \Delta \vec{Q}^{(atmos_dyn)} + \Delta \vec{Q}^{(sfc_dyn+storage)}$$

Planck feedback matrix $\left(\frac{\partial \vec{R}}{\partial T} \right) = \begin{pmatrix} \frac{\partial R_1}{\partial T_1} & \dots & \frac{\partial R_1}{\partial T_{M+1}} \\ \vdots & \ddots & \vdots \\ \frac{\partial R_{M+1}}{\partial T_1} & \dots & \frac{\partial R_{M+1}}{\partial T_{M+1}} \end{pmatrix}$

$$\Delta \vec{T} = \left(\frac{\partial \vec{R}}{\partial T} \right)^{-1} \left\{ \Delta \vec{S}^{(w)} + \Delta \vec{S}^{(c)} + \Delta \vec{S}^{(a)} + \Delta \vec{Q}^{(atmos_dyn)} + \Delta \vec{Q}^{(sfc_dyn+storage)} \right\}$$

Surface dynamics + heat storage
 Atmospheric dynamics

Decomposition Procedure

Define Neutral, El Niño, La Niña cases

ERA1
 El Niño case: Nino 3.4 index > 1σ → 7 El Niño cases
 La Niña case: Nino 3.4 index < -1σ → 5 La Niña cases
 Neutral case: |Nino 3.4 index| ≤ 0.5σ → 9 Neutral cases

CMIP5
 ENSO index: PC time-series of EOF 1st mode for the Tropical Pacific surface temperature without long-term trend (detrended TS)

Input for Radiative transfer model

Surface
 Solar insolation
 Surface pressure/ temperature
 surface latent/sensible heat flux
 surface downward/upward SW

Multi-layer
 Air temperature
 Specific humidity
 Cloud amount
 Cloud liquid/ice water

Energy perturbation terms

$$\Delta \vec{S}^{(w)}, \Delta \vec{S}^{(c)}, \Delta \vec{S}^{(a)}, \Delta \vec{Q}^{(atmos_dyn)}, \Delta \vec{Q}^{(sfc_dyn+storage)}$$

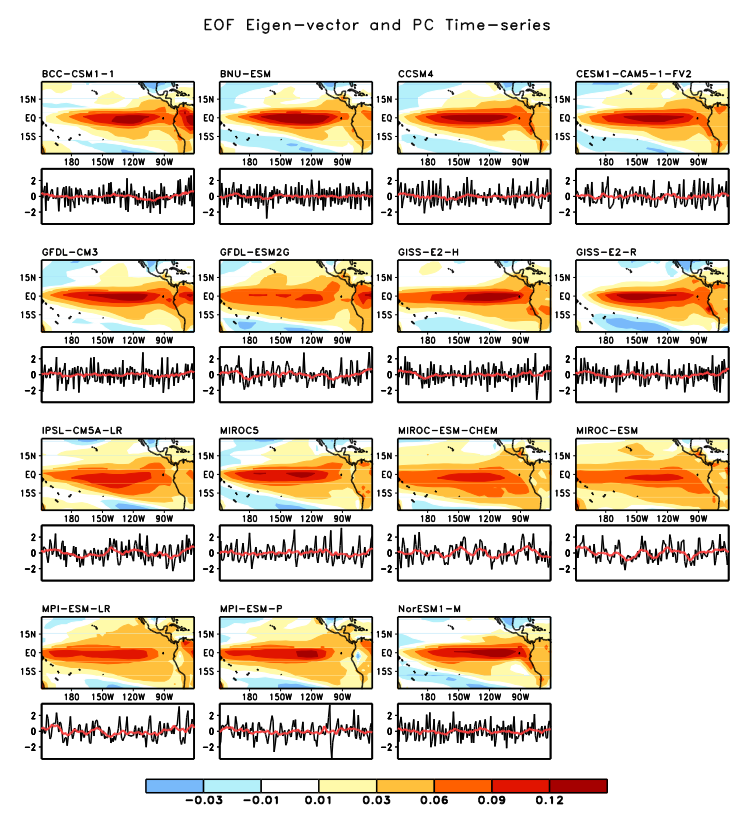

Partial temperature changes

$$\Delta \vec{T}^{(water\ vapor)}, \Delta \vec{T}^{(cloud)}, \Delta \vec{T}^{(albedo)}, \Delta \vec{T}^{(atmos_dyn)}, \Delta \vec{T}^{(sfc_dyn+storage)}$$

Composite

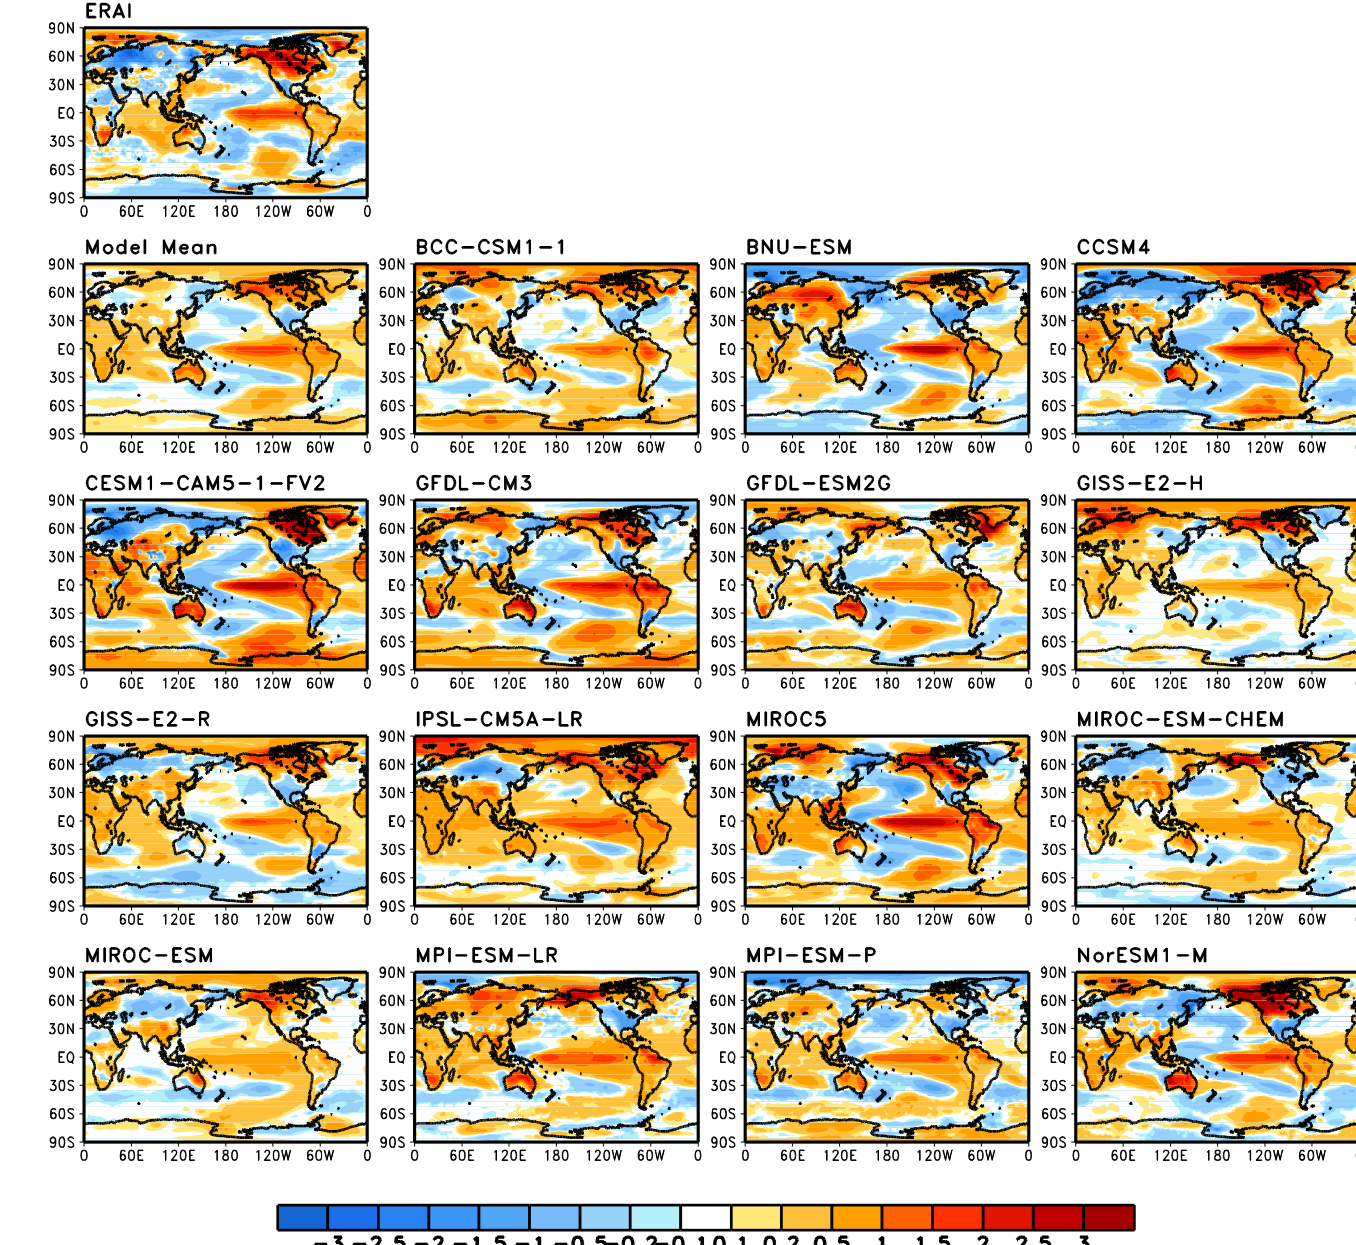

Fu-Liou radiative transfer model (Fu and Liou, 1992; 1993)

CFRAM (Lu and Cai, 2009)

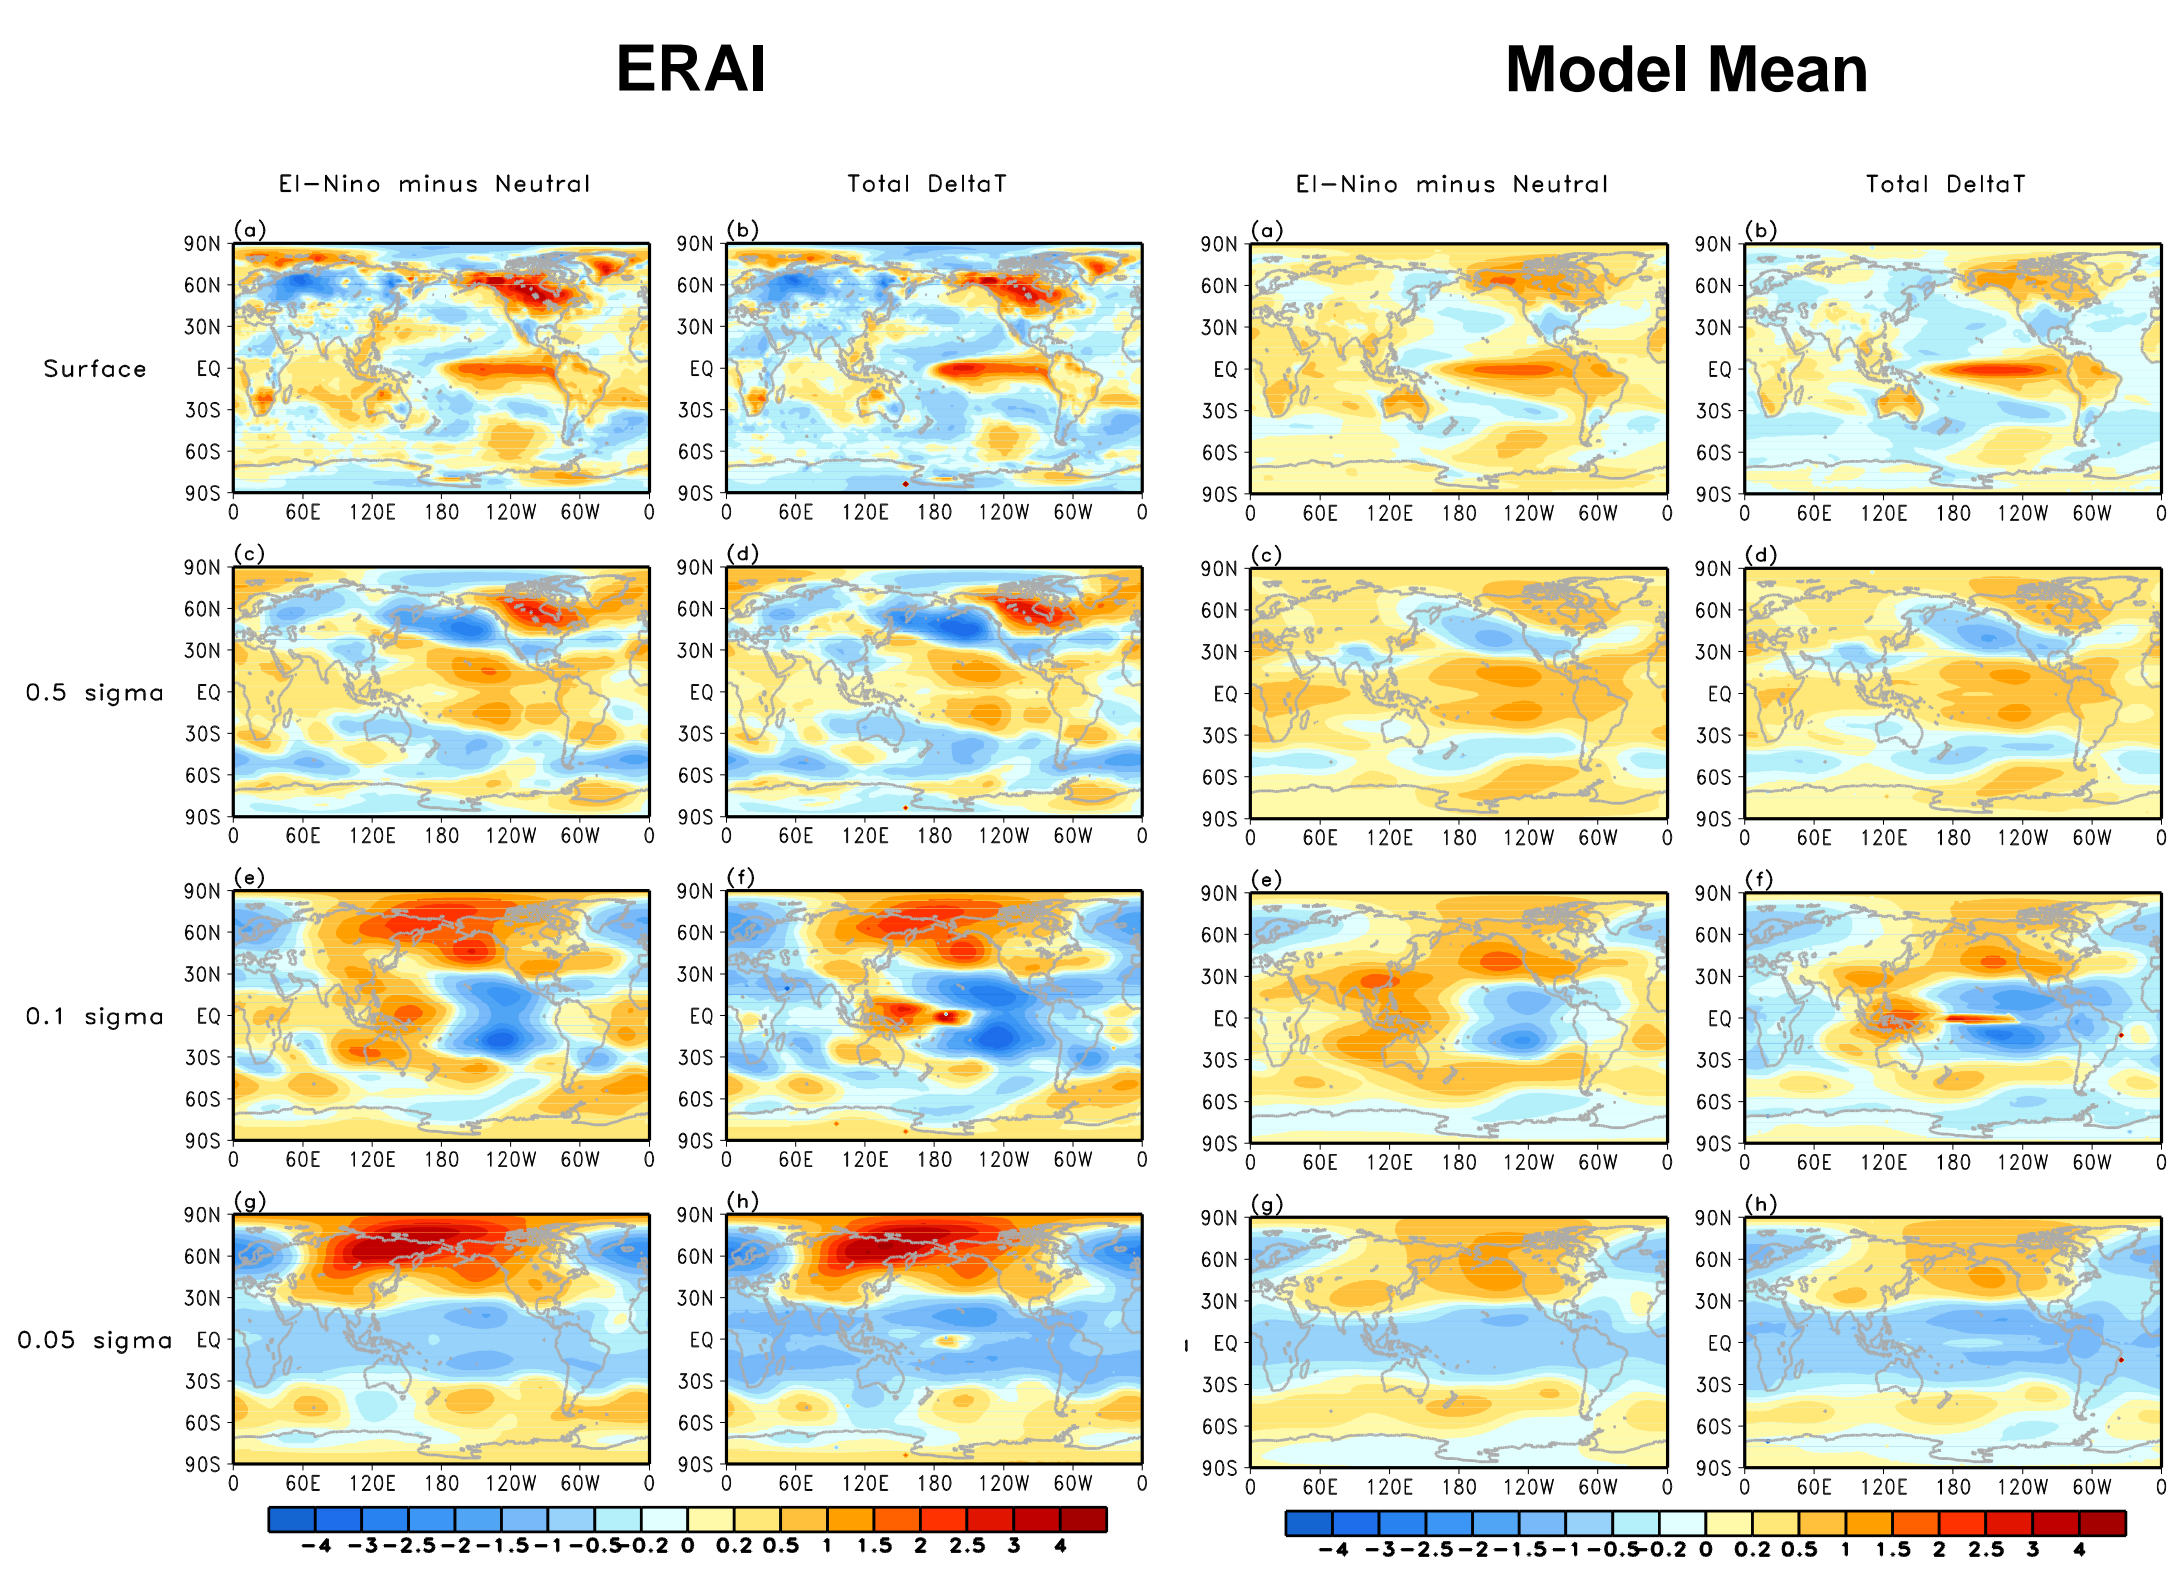

Validation of CFRAM

Difference of SAT between El-Niño and Neutral winters

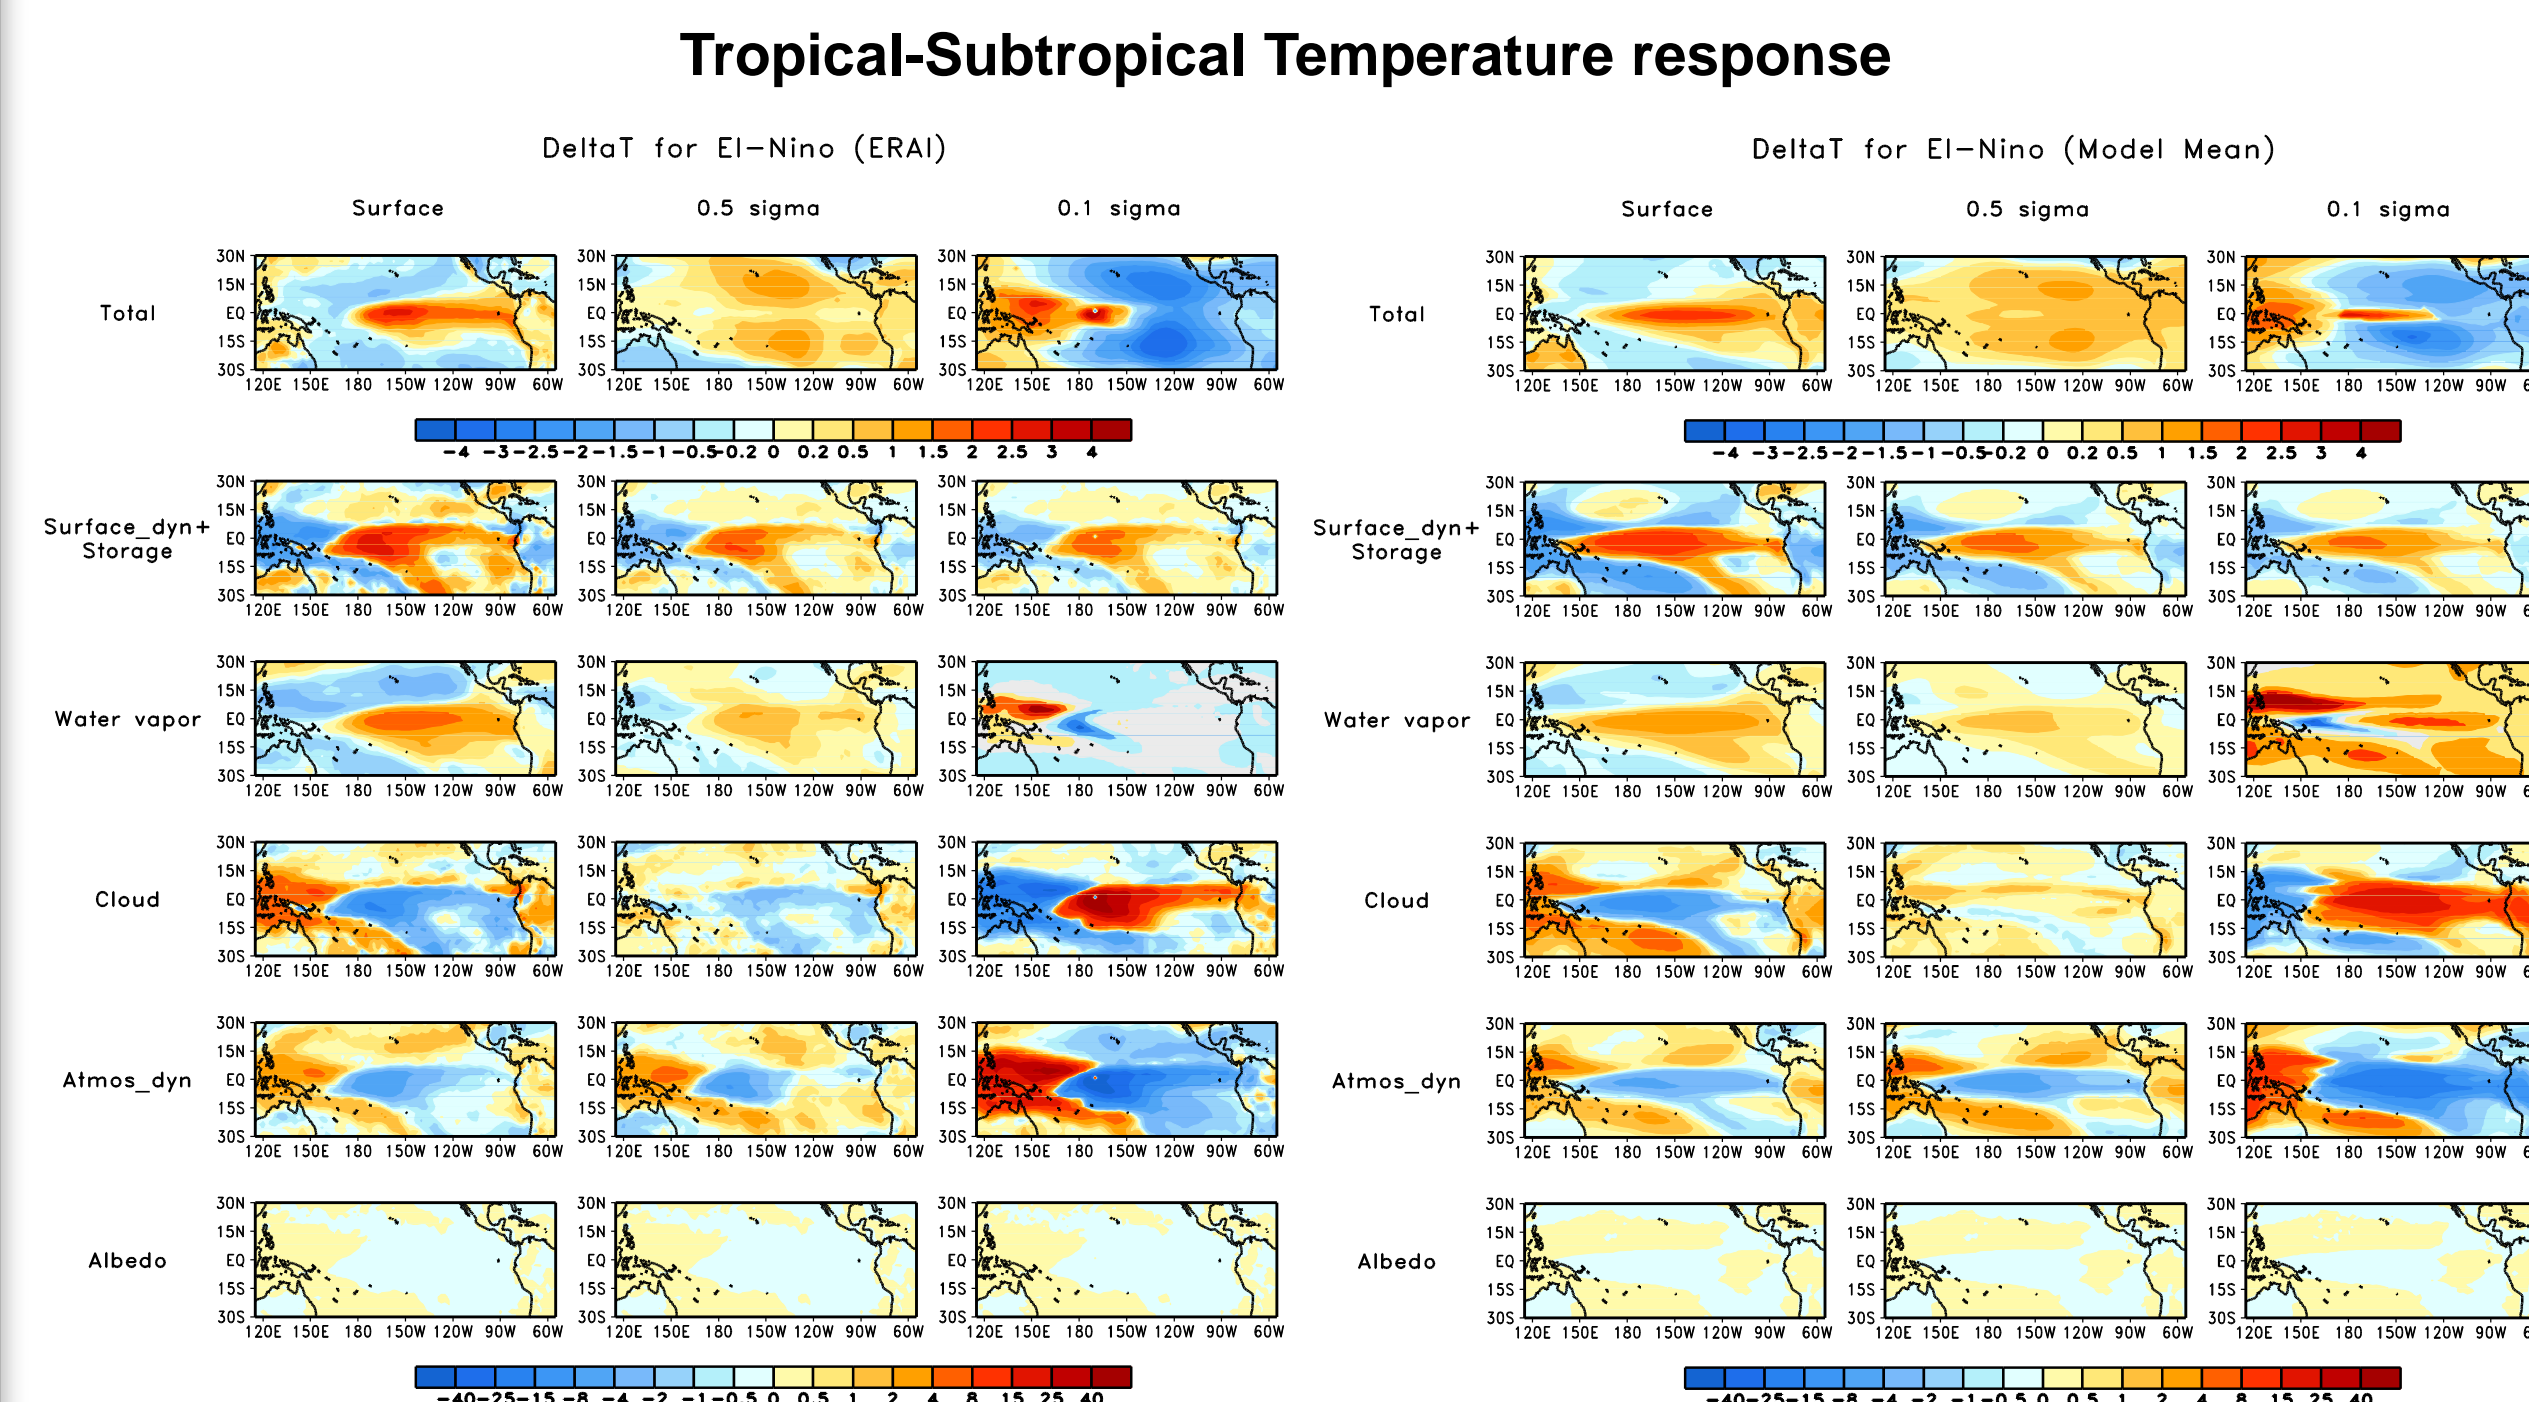

Total Temperature Change for El Niño $\Delta \vec{T}_{Total}$

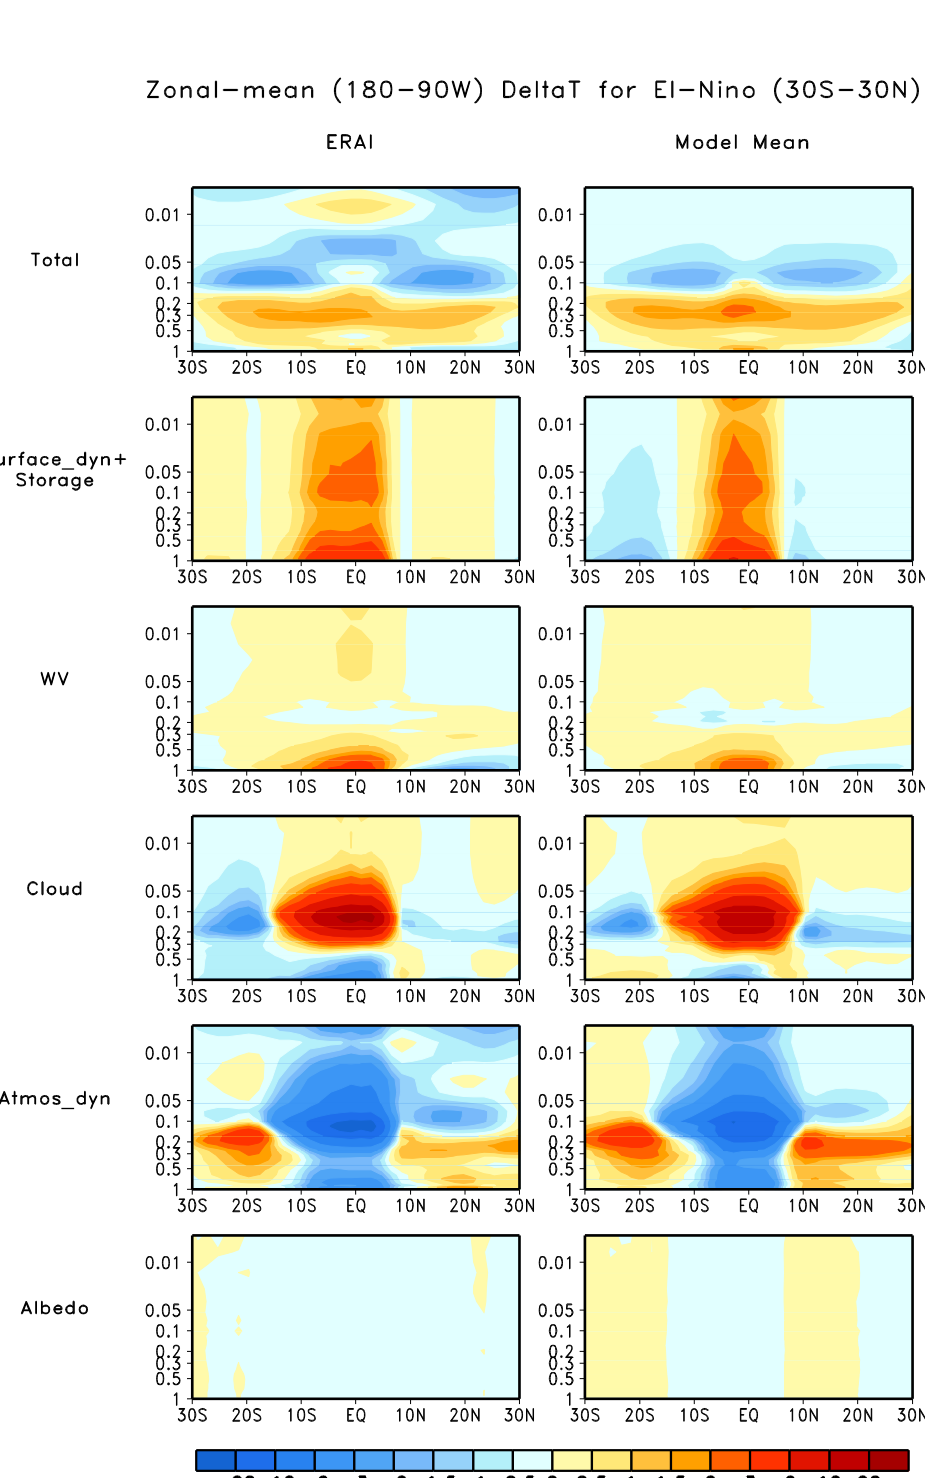

Decomposition Results

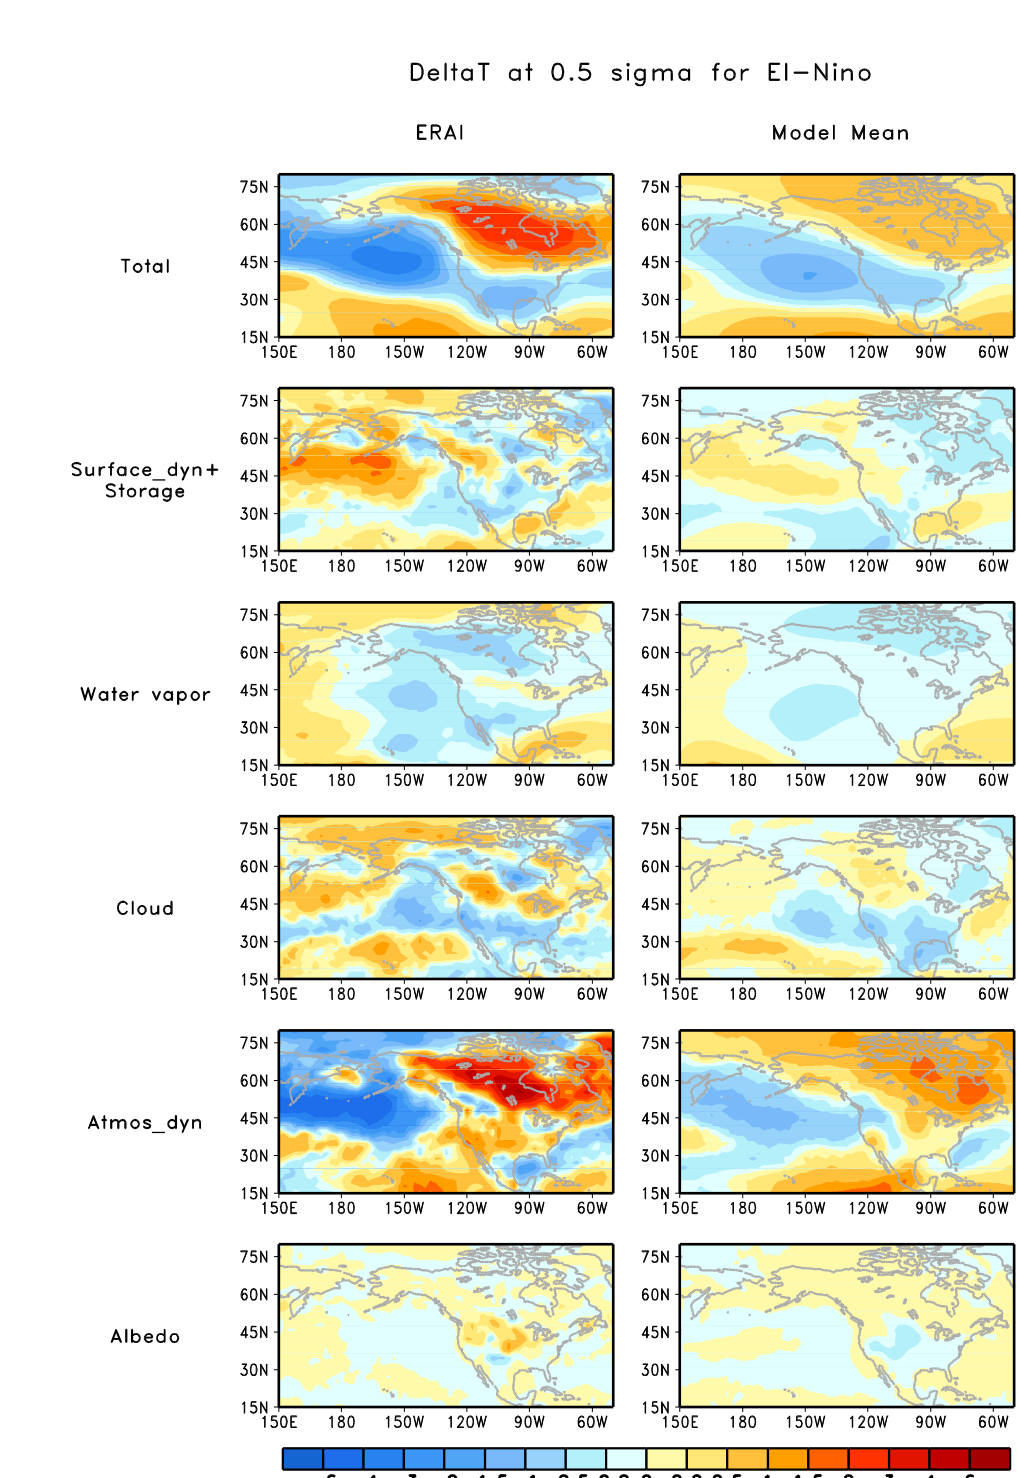

Spatial distribution of Relative Contribution

Zonal-mean feature over 30S-30N

Temperature response over PNA region

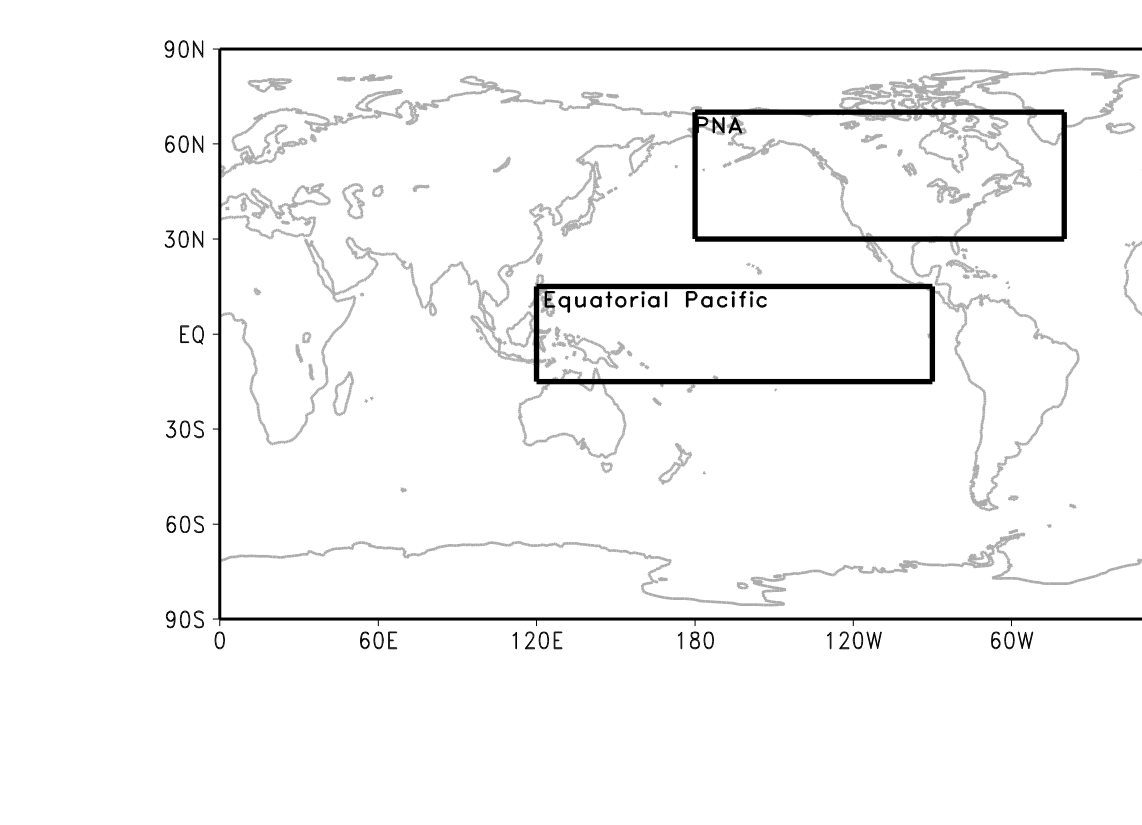

Quantification of Relative Contributions

Pattern Amplitude Projection

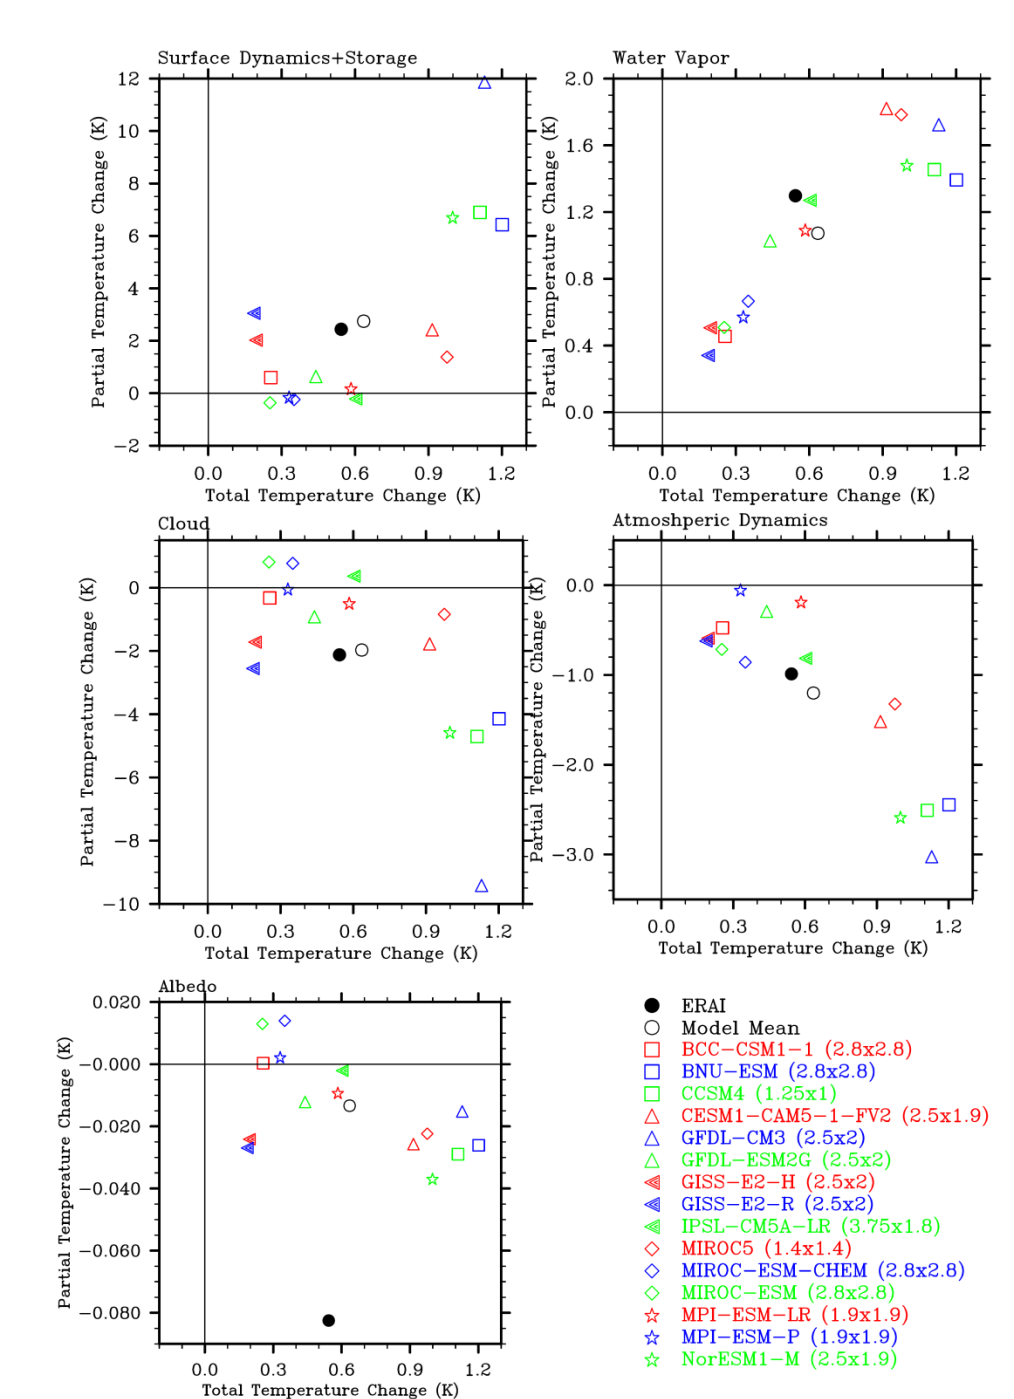

$$\overline{PAP}_i = A^{-1} \int_A a^2 \Delta \vec{T} \cos \phi d\lambda d\phi$$

$$A^{-1} \int_A a^2 \Delta \vec{T}_i \Delta \vec{T} \cos \phi d\lambda d\phi$$

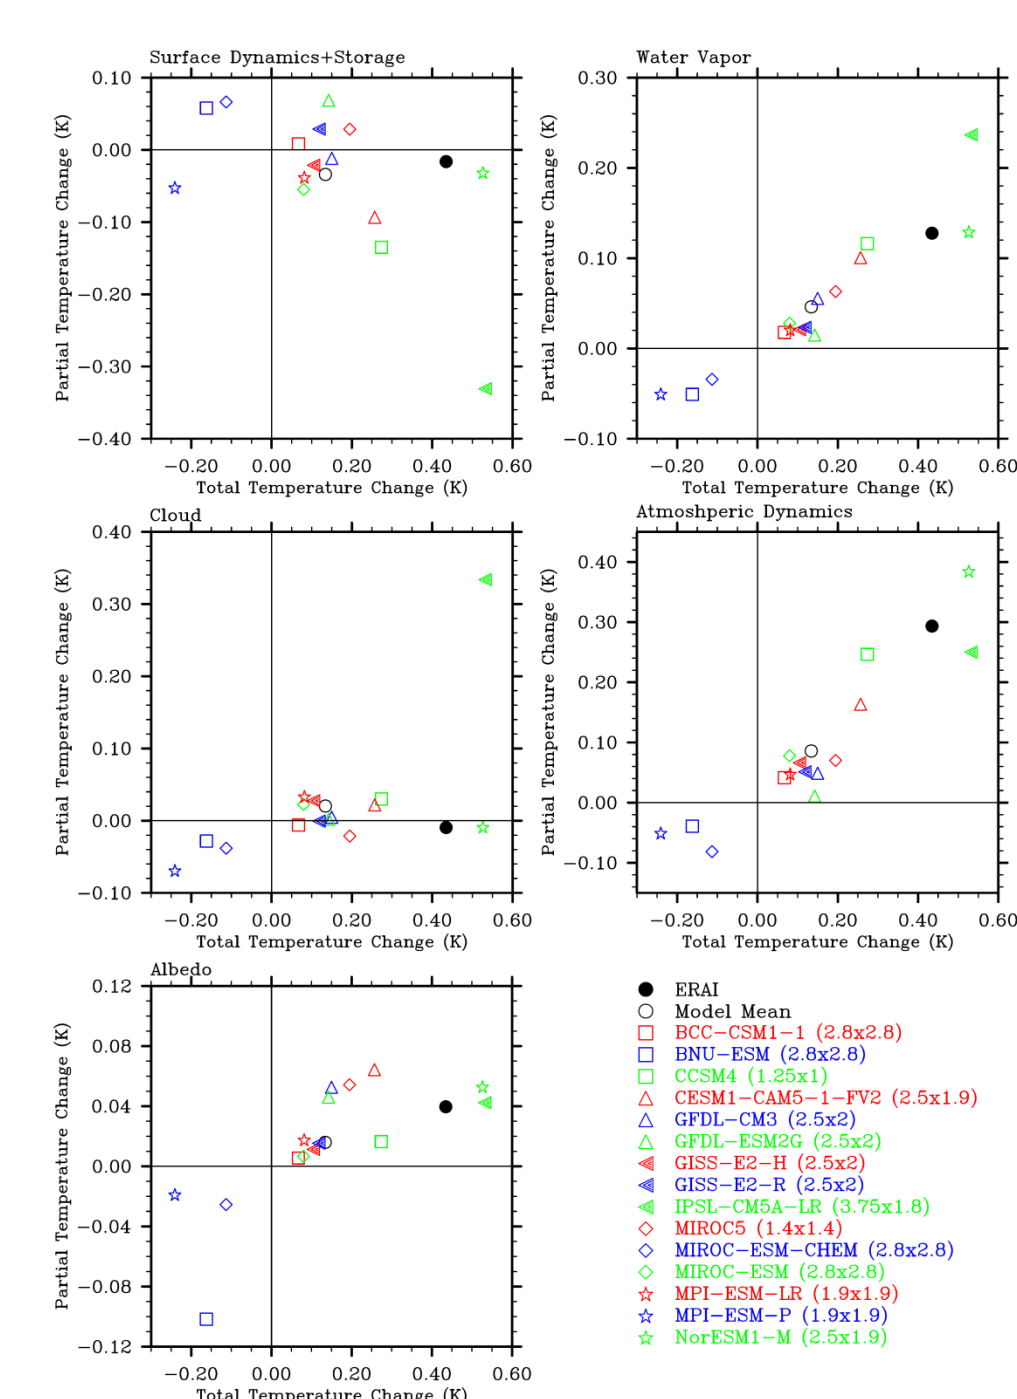

$$A^{-1} \int_A a^2 (\Delta \vec{T})^2 \cos \phi d\lambda d\phi$$

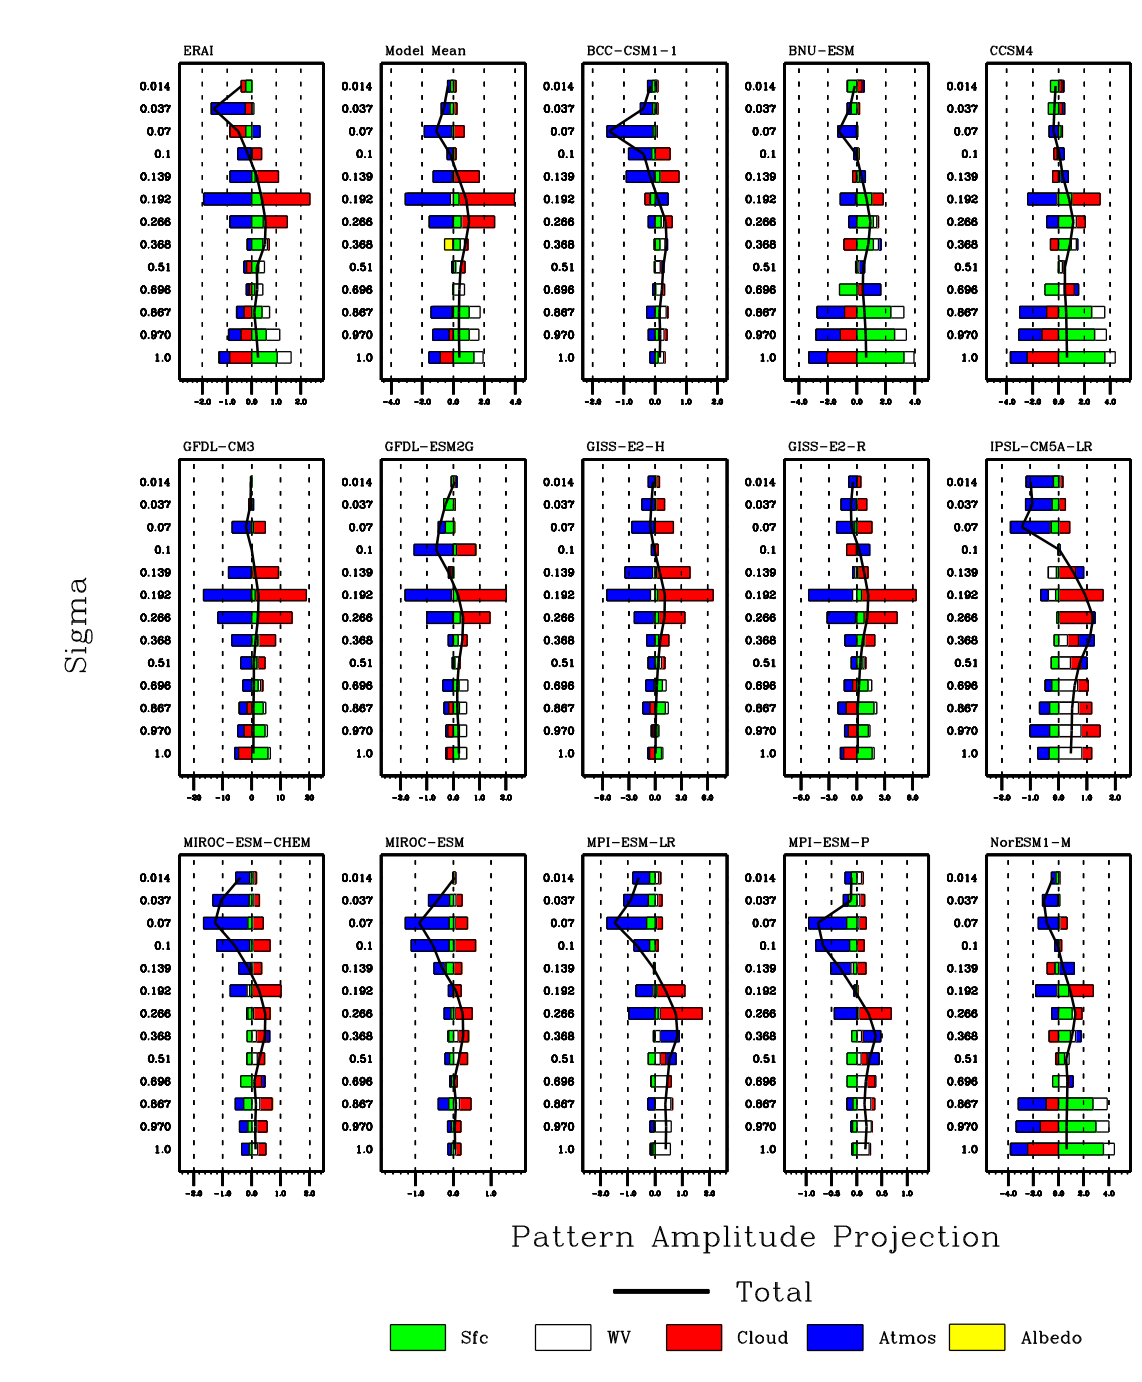

PAP over Equatorial Pacific

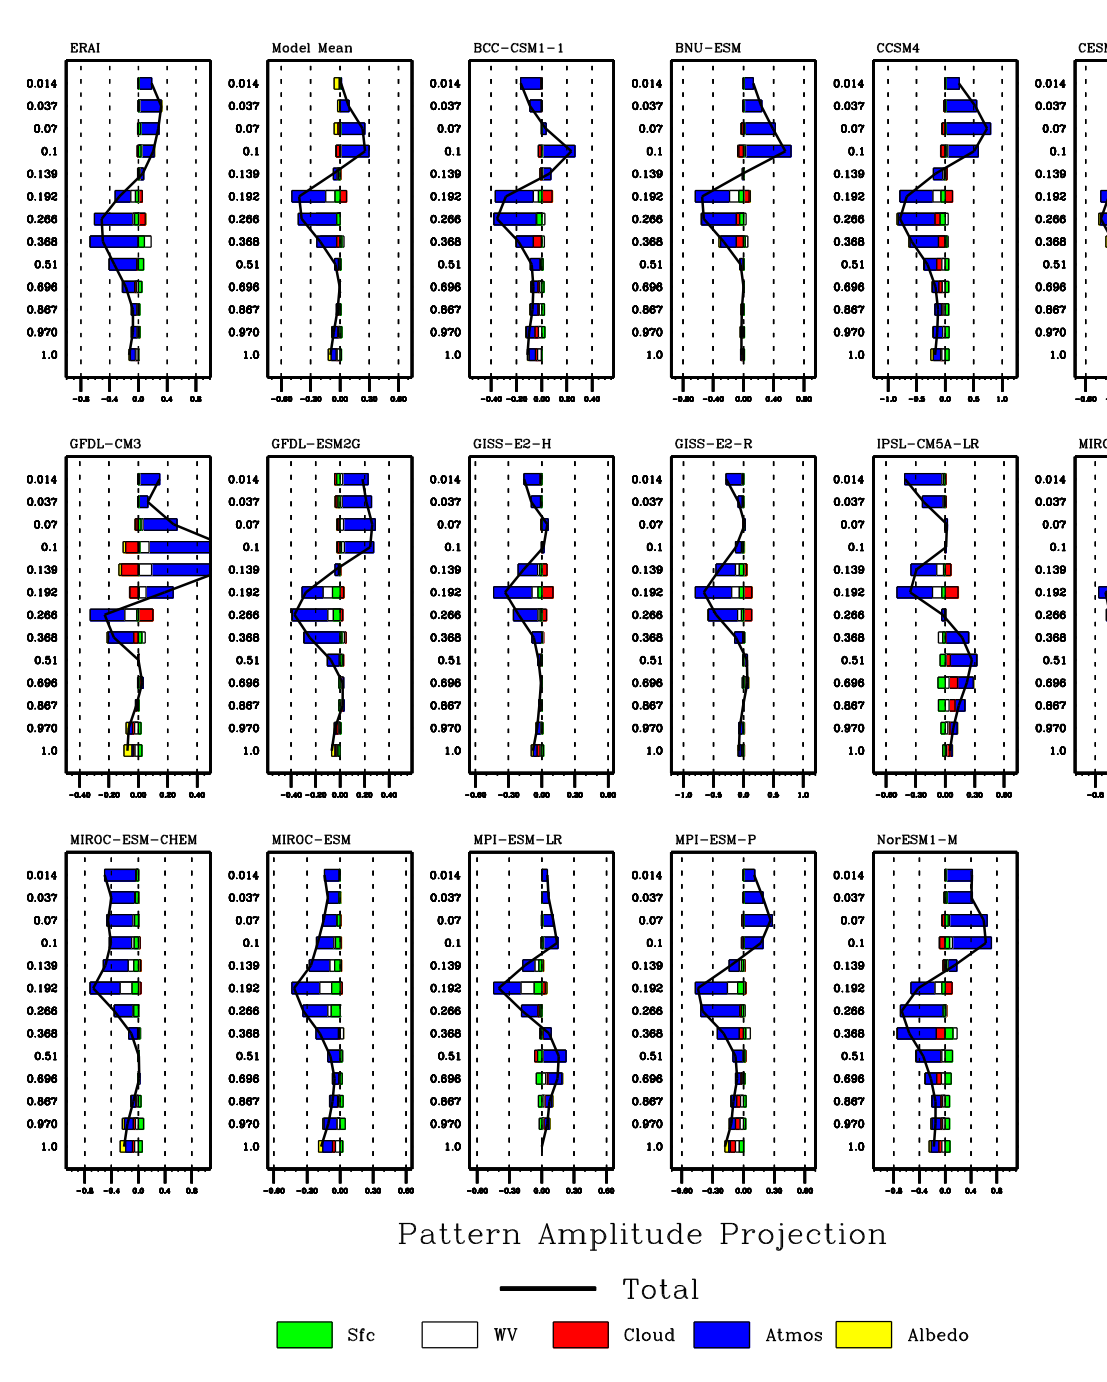

PAP over PNA region

Vertical Distribution of PAP over 10S-10N

Vertical Distribution of PAP over 30N-60N

Vertical Distribution of PAP over 60N-90N
