

Third US Climate Modeling Summit March 15th, 2017

The third annual meeting will be held in March 2017 in the Washington, DC area following an Arctic workshop convened by the CMS participants. The US CMS meeting works on building synergies in themes very relevant to multiple US agencies. The themes include: 1) Important Arctic Science conducted/planned at the various modeling centers; 2) Subseasonal-to-seasonal predictability that strives for seamless prediction capabilities; 3) Model Intercomparison Projects that include discussion/action on the CMIP6 activities; 4) Next generation HPC requirements for weather/climate.
